

Amendments to the Claims

Please amend the claims as follows:

- 1 Claim 1 (currently amended) A mogul cylinder assembly comprising:
- 2 a generally-cylindrical lock housing mogul having a front surface and a principal axis
- 3 and having a cylinder bore disposed therein having a principal axis parallel to, and offset
- 4 from, the principal axis of the lock housing mogul and an inner surface,
- 5 a first driver pin bore extending radially from, and orthogonal to, the principal
- 6 axis of the cylinder bore,
- 7 a second driver pin bore extending radially from, and orthogonal to, the
- 8 principal axis of the cylinder bore and orthogonal to the first pin bore, and
- 9 a third driver pin bore extending radially from, and orthogonal to, the principal
- 10 axis of the cylinder bore,
- 11 wherein the first driver pin bore is disposed counterclockwise from the second
- 12 driver pin bore radially about the principal axis of the cylinder bore and the third
- 13 driver pin bore is disposed clockwise from the second driver pin bore radially about
- 14 the principal axis of the cylinder bore;
- 15 a cylinder blank disposed within the cylinder bore and having a principal axis aligned
- 16 to the principal axis of the cylinder bore, a first pass key pin bore aligned to the first driver
- 17 pin bore of the lock housing mogul, a second pass key pin bore aligned to the second driver
- 18 pin bore of the lock housing mogul, and a third pass key pin bore aligned to the third driver
- 19 pin bore of the lock housing mogul;
- 20 a first driver pin disposed within the first driver pin bore;

21 a first pass key pin, having a conical shaped end, disposed within the first pass key pin
22 bore;
23 a second driver pin disposed within the second driver pin bore; and
24 a second pass key pin, having a conical shaped end, disposed within the second pass
25 key pin bore; a first hardened dowel pin disposed between the first driver pin bore and the
26 front surface of the lock housing mogul and a second hardened dowel pin disposed adjacent
27 to the first hardened dowel pin and the first driver pin bore.

1 Claim 2 (previously presented) The mogul cylinder assembly of claim 1 wherein at
2 least one of the first and second driver pin bores includes an internally-threaded portion
3 having a socket screw disposed therein.

1 Claim 3 (canceled)

1 Claim 4 (canceled)

1 Claim 5 (canceled)

1 Claim 6 (canceled)

1 Claim 7 (canceled)

1 Claim 8 (currently amended) A mogul cylinder assembly comprising:

2 a generally-cylindrical lock housing mogul having a front surface and a principal axis
3 and having a cylinder bore having a principal axis parallel to and offset from the principal
4 axis of the lock housing mogul, a principal central plane, having a first side and a second
5 side, aligned to the principal axis of the lock housing mogul and the principal axis of the
6 cylinder bore, and an inner surface,

7 a first set of one or more driver pin bores, disposed on a first side of the
8 principal central plane, aligned with a first set of one or more driver pin axes aligned
9 to a first driver pin plane extending radially from the principal axis of the cylinder
10 bore,

11 a second set of one or more driver pin bores extending radially from the
12 principal axis of the cylinder bore and not parallel to the first driver pin plane, and

13 a third set of one or more driver pin bores, disposed on a second side of the
14 principal central plane and extending radially from the principal axis of the cylinder
15 bore, each aligned to a third driver pin plane not parallel to any of the driver pin bores
16 in the second set of driver pin bores;

17 a cylinder blank disposed within the cylinder bore and having a principal axis aligned
18 to the principal axis of the cylinder bore, a first set of pass key pin bores each aligned to one
19 of the driver pin bores in the first set of driver pin bores of the lock housing mogul, a second
20 set of pass key pin bores each aligned to a driver pin bore in the second set of two or more
21 driver pin bores in the lock housing mogul, and a third set of pass key pin bores each aligned
22 to a driver pin bore in the third set of driver pin bores in the lock housing mogul;

23 a first set of driver pins, each disposed within one of the driver pin bores in the first
24 set of driver pin bores;

25 a first set of pass key pins, each having a conical shaped end and disposed within one
26 of the pass key pin bores in the first set of pass key pin bores;

27 a second set of one or more driver pins, each disposed within the second set of driver
28 pin bores; and

29 a second set of one or more pass key pins, each having a conical shaped end and
30 disposed within one of the second set of pass key pin bores; a first hardened dowel pin
31 disposed between the first set of driver pin bores and the front surface of the lock housing
32 mogul, a second hardened dowel pin disposed adjacent to the first hardened dowel pin; and a
33 hardened shielding device having the shape of a disk having a rectangular cutout therein
34 disposed between the first set of pass key pin bores and the front surface of the cylinder
35 blank.

1 Claim 9 (original) The mogul cylinder assembly of claim 8 wherein the first set of
2 driver pin bores is aligned with a first plane passing through the principal axis of the cylinder
3 bore and at least one of the bores in the second set of driver pin bores is disposed 90 degrees
4 to the first plane radially about the principal axis of the cylinder bore.

1 Claim 10 (canceled).

1 Claim 11 (currently amended) The mogul cylinder assembly of claim 8 wherein the first
2 and third planes are aligned with the principal axis of the cylinder bore, and the first and third

3 planes are disposed to either side of one of the bores in the second set of driver pin bores
4 radially about the principal axis of the cylinder bore by the same angle.

1 Claim 12 (canceled)

1 Claim 13 (canceled)

1 Claim 14 (currently amended) The mogul cylinder assembly of claim 8 further
2 comprising ~~a first set of~~ one or more hardened dowel pins disposed between the ~~first and~~
3 ~~second sets~~ set of driver pin bores and the front surface of the lock housing mogul ~~and one or~~
4 ~~more hardened shielding devices having the shape of a disk having a rectangular cutout~~
5 ~~therein disposed between the first and second sets of pass key pin bores and the front surface~~
6 ~~of the cylinder blank.~~

1 Claim 15 (currently amended) A mogul cylinder assembly comprising:

2 a generally-cylindrical lock housing mogul having a front surface and a principal axis
3 and having a cylinder bore having a principal axis parallel to and offset from the principal
4 axis of the lock housing mogul and an inner surface disposed therein,

5 a first set of driver pin bores, each having a threaded portion, aligned with a
6 first driver pin plane extending radially from the principal axis of the cylinder bore,

7 a second set of one or more driver pin bores, each having a threaded portion,
8 aligned with a second driver pin plane extending radially from the principal axis of
9 the cylinder bore radially offset from the first driver pin plane, and

10 a third set of one or more driver pin bores, each having a threaded portion,
11 aligned with a third driver pin plane extending radially from the principal axis of the
12 cylinder bore radially offset from the first and second driver pin planes;
13 a cylinder blank disposed within the cylinder bore and having
14 a principal axis parallel to and offset from the principal axis of the lock
15 housing mogul,
16 a first set of pass key pin bores each aligned to one of the driver pin bores in
17 the first set of driver pin bores of the lock housing mogul,
18 a second set of pass key pin bores each aligned to one of the driver pin bores
19 in the second set of driver pin bores of the lock housing mogul, and
20 a third set of pass key pin bores each aligned to one of the driver pin bores in
21 the third set of driver pin bores of the lock housing mogul;
22 a first set of driver pins, each disposed within one of the driver pin bores in the first
23 set of driver pin bores;
24 a first set of pass key pins, each having a conical end and disposed within one of the
25 pass key pin bores in the first set of pass key pin bores;
26 a second set of driver pins, each disposed within one of the driver pin bores in the
27 second set of driver pin bores;
28 a second set of pass key pins, each having a conical end and disposed within one of
29 the pass key pin bores in the second set of pass key pin bores;
30 a third set of driver pins, each disposed within one of the driver pin bores in the third
31 set of driver pin bores; and

32 a third set of pass key pins, each having a conical end and disposed within one of the
33 pass key pin bores in the third set of pass key pin bores;

34 a first hardened dowel pin disposed between the first set of driver pin bores
35 and the front surface of the lock housing mogul on a first side of the first driver pin
36 plane,

37 a second hardened dowel pin disposed between the first set of driver pin bores
38 and the front surface of the lock housing mogul on a second side of the first driver pin
39 plane, and

40 a third hardened dowel pin disposed between the first and second hardened
41 dowel pins and aligned to the first driver pin plane; and

42 a hardened shielding device having the shape of a disk having a rectangular cutout
43 therein disposed between the first set of pass key pin bores and the front surface of the
44 cylinder blank.

1 Claim 16 (canceled)

1 Claim 17 (canceled)

1 Claim 18 (currently amended) The mogul cylinder assembly of claim 15 further
2 comprising one or more hardened dowel pins disposed between the first and second [[sets]]
3 set of driver pin bores and the front surface of the lock housing mogul ~~and one or more~~
4 ~~hardened shielding devices having the shape of a disk having a rectangular cutout therein~~
5 ~~disposed between the first and second sets of pass key pin bores and the front surface of the~~
6 ~~cylinder blank.~~

1 Claim 19 (currently amended) The mogul cylinder assembly of claim 15 wherein the
2 first, second, and third sets of pass key pins are protected by [[a]] the hardened cylinder
3 ~~shield having the shape of a disk having a rectangular cutout therein disposed between the~~
4 ~~pass key pin bores and the front surface of the cylinder blank.~~

1 Claim 20 (original) The mogul cylinder assembly of claim 15 wherein each of the first,
2 second, and third sets of driver pins are protected by one or more hardened dowel pins
3 disposed between the driver pin bores and the front surface of the lock housing mogul.
